

Nikolay Mokeev

Lead Product Designer → **PORTFOLIO**

Data-Heavy Interfaces · B2B SaaS · 0→1 · Complex Products
Cyprus · Open to Remote / Distributed Teams

Product designer with 19 years in design and 10 years building complex digital products.

I turn complex systems, large datasets, states and constraints into clear interfaces for professional users. Strong in **0→1 product design**, **user research**, **information architecture**, **data visualization** and **design systems**.

For most of my product career, I operated as the sole designer with end-to-end ownership — from research and problem framing to prototypes, polished UI, design systems, implementation and user feedback. I now want to bring this experience to leading a **small product design team while remaining hands-on**.

RECENT WORK

Customer Portal — responsive B2B platform for hosting & cloud infrastructure, network orchestration, security, billing and support.

BackOffice — mission-critical operational platform with dense data, interconnected entities, software integrations, and complex workflows; used daily by hundreds of employees worldwide.

Knowledge & API Platform — technical documentation ecosystem for DevOps engineers and developers, including public API, code examples and contextual integration with the product.

Video Platform with NDA — the startup, mobile-first 0→1 consumer product designed across phone, tablet, desktop and TV.

MOKEEV.com — designed and built an animated personal website through an *AI-assisted development workflow without prior coding experience*.

Russian — Native
English — Fluent
Greek — A2

TOOLS

Figma: components, variables, tokens, prototyping

Storybook · Matomo

Jira · Confluence

Illustrator · Photoshop

ChatGPT · Claude · AI image generation

EXPERIENCE

SERVERS.COM — Product Designer

October '16 – Present · B2B SaaS / Cloud Infrastructure

- Owned product design across **three complex products** used by thousands of customers and hundreds of employees worldwide;
- Designed a **0→1 BackOffice platform** and evolved it for 8 years from an early Material UI-based interface into an operational system used daily across the company with positive feedback only;
- Built **3 design systems from scratch** for BackOffice, Customer Portal and Docs: components, variants, variables, design tokens, styles, prototypes and documentation, synchronized with Storybook;
- Designed data-heavy workflows involving infrastructure, hardware, billing, permissions, audit history, statuses, alerts, resource usage and complex operational constraints;
- Ran research end to end: **recruiting users, customer interviews, corridor/usability testing, hypothesis validation and presenting findings**;
- Established a continuous feedback loop between users, Product and Engineering through **Jira, Figma, Confluence and Storybook**;
- Worked closely with Product and Engineering on complex new workflows; currently 150+ designed product tasks are waiting for implementation;
- Created dashboards, summary tables, resource-usage visualizations, color-coding systems and a **100+ icon system** for technical products;
- Led product discovery for major initiatives, including evaluating **10+ competing hypotheses**, extensive competitive/user/technical analysis, interactive prototypes, stakeholder reviews and usability validation;

- Participated in designer hiring and later provided design feedback, mentoring and knowledge sharing;
- Use **LLMs and AI-assisted workflows** for hypothesis exploration, alternative solutions, documentation and implementation support.

Kontinent Group — Art Director / Marketer

June '13 – September '16 · International Multi-Brand Business

- Owned design direction across 12 brands spanning digital products, e-commerce, industrial products and consumer goods;
- Created brand identities and a corporate visual system spanning websites, communication, photography and marketing;
- Worked directly with company leadership, Marketing and Sales;
- Managed **1 copywriter** while remaining hands-on across design and creative direction.

Freelance — Independent Designer

June '04 – Present · Websites, E-commerce Products, Identities

- Combined UX/UI, branding, art direction, photography and copywriting directly with clients.

Publishing House — Lead Artist

September '07 – December '11

- Designed and produced high-volume editorial and commercial materials, working hands-on from layouts and prepress to final production;
- In parallel, developed independent work across websites, e-commerce, gradually shifting my focus from print to digital products.
